

Eucalypt Biology, Identification and Management Webinar

A transcontinental, 3-day webinar with two of the world's experts on *Eucalyptus*: Dr. Dean Nicolle (Australia) and Dr. Matt Ritter (USA)

When:

For USA participants: July 14, 15, 16
3:30–5:30 PM, Pacific Standard Time

For Australian participants: July 15, 16, 17
8:00 – 10:00 AM, Australian Central Standard Time

Eucalyptus are the most commonly grown trees in the world. In this three-day, mini-course webinar, Drs. Nicolle and Ritter will begin with the basics of *Eucalyptus* trees and continue on to explore in depth the biology, ecology, selection, and uses of these versatile trees in the urban forest.

Day 1: *Eucalyptus* biology and worldwide cultivation

Day 2: *Eucalyptus* identification using keys

Day 3: *Eucalyptus* in urban forestry

ISA/APLD Continuing Education Units Available:
6.00 CEUs CTM, 3 BCMA science, 3 BCMA practice

To register:

www.matritter.net/eucalypt-webinar

The live, un-recorded webinar includes all three 2-hour sessions (6 hours total).

Registration fee: \$50.00 (U.S. dollars)

You will receive a Zoom link to the webinar once registered.

Questions: Contact Matt Ritter at mritter@calpoly.edu

Workshop Instructors

Dr. Dean Nicolle has authored many scientific publications on the systematics, taxonomy, functional ecology, biochemistry and cultivation of eucalypts, as well as several books on Australian eucalypts. He is a consulting arborist and runs the Currency Creek Arboretum in Adelaide.

Dr. Matt Ritter is a professor in California who has authored numerous scientific papers and botanical treatments on the biology and taxonomy of eucalypts. He is also the author of several books about trees. He's the winner of the ISA R. W. Harris Award for excellence in education.
